

LEAK ADJUSTMENT REQUEST FORM

Fallbrook Public Utility District
990 E. Mission Rd
Fallbrook CA, 92028
(760) 728-1125

Owners Name: _____
Site Address: _____
Mailing Address: _____
(if different) _____ Phone: _____
Account No. _____ Cell: _____
Email: _____

Please provide, to the best of your ability, ample evidence of a leak (photos, receipts, or other, as available) and a leak timeline for the District to review. Please provide your comments and reasoning below. *Things to consider are:* when, why, how the leak occurred, and who repaired your leak, the pipe size, and duration of leak (most important!). To determine the leak amount the District must also be able to determine the amount of “normal” water use for the customer. Leak adjustments will be credited to the customer's account for the water quantity leaked. The credit is calculated based on selected FPUD Operating costs determined by the 2022 Water, Wastewater, and Recycled Water Rate Study.

- Check here if the leak occurred during the winter months and may affect sewer flow calculations.
- Check here for commercial accounts, if leak affects sewer billing and flow charges and water did not go down the drain.
- Check here if you only want to have the sewer flow reviewed – with no leak adjustment/ credit.
